

I listen to Air 1 on 95.3 FM in Lexington, Ky. I am someone who only listens to the radio because I do not own a television. Air 1 not only provides me with entertainment by their great selection of music, they also provide me with encouragement everyday by the positive selection of music they provide. I believe there is a market for Air 1 in my community. I know of many others that have their radio frequency set to 95.3 as well. If Air 1 is replaced by an LPFM broadcaster that provides other programming, I will have to pull my sponsorship from Air 1 and go without the music I love to hear. Please keep Air 1 the way it is.
